DETAILED ACTION

1. Applicants election of the species "mucositis (oral and gastrointestinal)" in Paper No:7 is acknowledged. However, since the examiner is restricting between Groups I and II the applicant is given the opportunity to elect a species as indicated in Paragraph 3.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121. Even though the examiner contacted applicant's representative, David Johnson, a telephone restriction could not be made.

- I. Claims 1- 35, drawn to a method of treating an inflammatory disorder, classified in class 424, subclass 85.2.
- II. Claims 36 - 46, drawn to a composition comprising IL-11 for treating an inflammatory disorder, classified in class 424, subclass 85.2.

The inventions are distinct, each from the other, for reasons:

Inventions I and II are related as process of use and product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the composition of interferon can be used in pharmaceutical compositions as shown above, or it can be used in diagnostic assays, or as a probe.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. In addition, this application contains claims directed to the following patentably distinct species of the claimed invention:

- (i) mucositis (oral and gastrointestinal)
- (ii) inflammatory skin disorder
- (iii) necrotizing enterocolitis
- (iv) ocular diseases
- (v) aphthous ulcers
- (vi) pharyngitis
- (vii) esophagitis
- (viii) peptic ulcers
- (ix) gingivitis
- (x) periodontitis

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1, 11-46 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jegatheesan Seharaseyon whose telephone number is 703-305-1112. The examiner can normally be reached on M-F: 8:30-4:30.
